To harvest the same and make the present education system inclusive, the degree of democratization of higher education must be increased to a large extent. Further, institutes should become more responsive to the needs and constraints of the disadvantaged social groups such as SCs, STs, women, OBC (non-creamy layer), minorities and physically challenged persons. Therefore, Equal Opportunity Cell (EOC) has been established in institutes.

To oversee the effective implementation of policies and programmes for disadvantaged groups, to provide guidance and counselling with respect to academic, financial, social and other matters and to enhance the diversity within the campus.

15.20 Teaching Learning Process

The institution always believed in the adoption of student-centric methods to enhance student involvement as a part of lifelong learning skills and focuses on the spirit of excellence and commitment to high-quality education.

The contemporary teaching-learning process in the institution enables graduating students.

- Focus on educating engineers for the future.

- Prepare them to face the challenges of the twenty-first century.

- Serve as competent and confident engineers.

Teachers create more interest in learning things by doing. Laboratory experimentation method is used to develop scientific knowledge among students through direct exposure individually. All students practice hands-on training and experimentation individually in laboratories and some experiments practiced are group experiments. Students are trained in problem solving abilities through practical exposure in laboratories. Viva voce is conducted for all experiments to assess subjective and objective knowledge of students individually. It is very useful for mentors to assess and categorize students.

Experiential Learning:

- Laboratory experimentation sessions are conducted to develop scientific knowledge among students through direct exposure individually.

- **Hands-on training:** Summer Internship-Students get hands-on training while working in the software companies.

- Industrial visits to engage students in experiential learning while visiting the organization.

Project-based learning:

- Project work is mandatory and included as an integral part of the course.

- The students have gained knowledge in critical thinking and new ideas, and new methods.

Participatory Learning:

- Students participate in various activities such as group discussions, seminars, skill-based add-on courses.

- Technical symposium organized every year in GEC where students can present their posters and oral presentations and project expo etc.

Problem-solving methods:

- Conducting class tests and giving assignments after the completion of each unit

- Group discussions.

- Class presentations

- Participation in Inter college events.

ICT

One of the essential life skills in current times is digital literacy. It is imperative for teachers to adopt the latest ICT technologies for teaching. GEC has adopted ICT-enabled teaching methods in addition to conventional classroom teaching. The faculty use ICT-enabled learning tools such as PPT, Video clippings, and Audio systems, to impart advanced technologies and practical knowledge.

The faculty use electronic resources from platforms like DELNET, NPTEL, and Digital Library for updating themselves with the state of art technologies. In the recent pandemic situation, the education sector is one of the affected fields. But ICT tools enabled teachers to continue academic activities. The faculty use presentation tools like Webex, Google meet, Slide share etc. which can be shared with students.
